

Akshay Tiwari

Web Developer

I'm a multi-disciplinary Web-App Developer who's delivered creative and engaging tech solutions to various organizations. I have almost two years of hands-on experience efficiently coding websites and applications using modern HTML, CSS, and JavaScript as well as Javascript frameworks like React. Building state-of-the-art, easy to use, user-friendly websites and applications is truly a passion of mine.

GTBPI

High School

Pt. YadRam Sec. public school

SKILLS

html

CSS

JavaScript

ES6

React.js

RestAPI

Redux

JQuery

BootStrap

Git

SASS

node

PERSONAL PROJECTS

Linky - A link shortner 🔗

- It's free, no login required.
- Used NextJs for server-side rendering which makes it fast in comparison to Client-side rendering.
- Use Node.js for backend and MongoDB for Database.
- Backend deployed on Heroku and front-end on Vercel.

Form builder unding drag and drop

(06/2020 - 06/2020) 🔗

- I used purely react to develop this app. Users can drag and drop the element to create their own form and can export JSON data for the LIQUID file or react app.

Memory Game (08/2018 - 08/2018) 🔗

- This is a memory game you make a match in this game. How much can you fast? You should try this game is really cool and interesting game. I used HTML, CSS, JavaScript.

Smart Brains (12/2018 - 12/2018) 🔗

- This is a web project for face recognition (only one face can be recognition). The front end is made by React, the back end uses the Express.js and database is PostgreSQL. This whole project deployed on the Heroku.

Random Quote machine (03/2018 - 03/2018) 🔗

- I used public API on this website. Users click on the "New Quote" button it will give you a new quote every time and you can share them on your Twitter account. I used HTML, CSS, Bootstrap, public API.

ACHIEVEMENTS

Google Reskill development program

(02/2018 - 11/2018)
